PLAINTIFF'S EXHIBIT

UC-3415

Dear Mr._____

It has been brought to our notice that you have had occasions to work with asbestos. Under OSHA regulation, employees exposed to asbestos have to be given appropriate medical examination for asbestosis at company expense. I am enclosing herewith an order for chest x-ray examination which you can take to Kanawha Valley Radiologists, 416 Division St.(ground floor) in South Charleston, and get the examination. Asbestosis is an x-ray diagnosis and if the radiologists finds any evidence of asbestosis changes in your lungs, we will get in touch with you and offer you further examination. Also, you are offered every two years our Multiphasic Health Screening examination which includes a complete medical history, chest x-ray if needed, pulmonary function test, and blood tests, etc. We encourage you to take advantage of it when you get the letter referring you to schedule for an examination.

The Medical Department would like to emphasize that asbestosis is a disease for which there is really no treatment and therefore you should pay proper attention to work, namely, avoid creating dusty conditions and use a dust respirator whenever there are any chances for unusual exposures, and also not smoking cigarettes will go a long way in prevention of this condition.

Very truly yours,

UCC 017195
