Mr. D. R. Shearer
Mr. W. T. Shelton
Mr. C. W. Wible

From: G. F. Hurley/M. E. Perry

Subject: Removal and Disposal of Asbestos Containing Insulation. Clarification and Additions

Clarification of Items 1 and 2 of the Merz/Perry letter of November 6, 1978, on the subject follows:

1. The Industrial Hygiene Group will continue to be informed previous to the start of demolition. Based on the size, complexity, location and work practices, a decision will be made on the need for personal monitoring for asbestos. Many jobs are small and similar to earlier monitored demolitions where little or no asbestos was found. For these, the established recommended work practices to assure personal protection from exposure will suffice. Monitoring will not be required.

2. Monitoring will be required:

   a. Where an unusual situation occurs so that the appropriate work practices may not be usable in whole or in part.
