Mr. M. J. Messel
Mr. M. Taschereau
Mr. M. Dorais
Mr. M. Prus
Mr. D. Little
Mr. H. Robinson - Woodsreef
Mr. John L. Myers - Union Carbide Corp.

Gentlemen:

Attached is a sample bag with the newest caution label used by J-M and the new "a" logo. The wording that you use in your caution label is of course your own business, the J-M label is only a suggestion. I would, however, urge you to print the "a" logo exactly as it is on this sample bag and as close to your caution label as practical so that the two interrelate.

It is the objective of the Asbestos International Association to have all bags going into the European Economic Community marked with the "a" logo no later than the end of the first quarter 1980. For your information, it is J-M's intention to use the "a" logo worldwide.

I remind you that the voluntary use of the "a" logo by all producers shipping in to the E.E.C. will, we hope, serve to head off their intention to brand asbestos a toxic material by requiring the printing of their skull and cross bones logo on every bag.

cc: Sir Neville Stack
