The circled section on the attached page from DOT regulations describes how the new marking, "ASBESTOS-ORM-C", should be applied to packages of asbestos and bulk hopper cars.

Perhaps you should check with SP on bulk cars assigned by them to the Uvalde flow. They may prefer a label rather than a painted stencil. When bulk cars are released from asbestos service the marking should be removed or obliterated.

I would suggest that nothing be done until we hear from Corporate Distribution on the final DOT asbestos regulations.
