ASBESTOS

Unit: $1,000

UCC Sales:

1975 ABB	December		Year-to-Date		
	Sales $	% ABB	Sales $	% ABB	%'74
992	76	92	518	52	79

Comments: The asbestos started with ABB of $992M, but the outcome for 1975 has ended at $518M or 52% of ABB. The poor performance is due to acute depression in Japan during 1975, especially in building industries for bath tubs and ceiling tile as well as for floor tiles.

Sales Progress:

The US demand for asbestos has been more than the King City production that the deliver for Japan has been delayed and Japanese customer supplies has been barely fulfilled that Mr. Fukuma had to fly to San Francisco to meet John Myers from Dec. 9 to 18, 1975 to request for a special deliveries to prevent customers supply shortage.

With John Myers' special consideration Mr. Fukuma has been receiving cargo without gap, but still not quite sufficient for safe inventory.
