Subject Bag Labelling for Europe

K-4

We will soon be ordering RG-244 bags and I plan to revise the face of the bag to include the OSHA warning in six languages and the "a" logo, per the attached photos. The border around the "a" will be red and the "a" itself will be the bag, which is unbleached kraft. The Japanese warning will continue to be printed on the back and the DOT "Asbestos ORM-C" on one end.

Enclosed are samples of the labels we are now applying to RG-244 bags destined for Europe. We are putting the labels on the back of the bag. Also enclosed are Xerox copies of the back of the SX bag, the current RG-244 bag, and the proposed RG-244 bag.

We will also have to revise the bag we use for RG-144 and other open products in the same manner.

I would appreciate your comments and/or approval of the revised labelling proposal at your earliest convenience.

John L. Myers
