John,
This is the right kind of press our people are doing it right.
Gw

Suggest you post on bulletin board for 30 days.

Dear John:

On Tuesday April 4th I audited the asbestos job at Polymers I drum filling for the following:

1. Barricades.
2. Personnel protection.
3. Housekeeping.
4. Warning signs.

I found no deficiencies and was impressed by the way your insulators had extended their barricades (flags) to the north to compensate for the elevated wind velocity. They were also wetting down the area to reduce the spreading of the insulation once it hit the concrete.

This was an outstanding effort.

In the interest of industrial hygiene,

Mac
C. A. McNeill
