UNION CARBIDE CORPORATION
P.O. Box 579 Niagara Falls, N.Y. 14302

By B. L. Ingalls

Date 7/24/72

Full Name Allied Resin Corporation East Weymouth, Massachusetts Address Mfrs. of	Interviewed Charles Howland, President (Telecon)

Charlie Howland called to inquire if we would run a dust count at Avco's facilities in Lowell, Massachusetts sometime in the not too distant future. He said he had discussed this with them and they are most anxious for us to run tests. I told Charlie we were presently training a man in the proficiencies of taking dust samples and making the necessary counts, however, it would probably be at least a month or longer before we would be able to accommodate them.

Avco is apparently using the RG-244 on a daily basis and, therefore, would not be difficult to schedule from a survey standpoint.

RECOMMENDED ACTION

EJK Ed, when you feel that you have sufficient time, I suggest we get together and prepare to visit Avco to make the necessary tests. Anytime in the next two months should be sufficient.
