UNION CARBIDE

Asbestos storage (Warehouse)
No activity ∠1

While most of these samples are below the limit. it is suggested that these locations where more than 2 fibers were noted be resampled on an early schedule. It might also be possible that housekeeping needs improvement in these locations.

I expect to be out your way after the middle of next month and will make a re-survey at that time. If you have any questions. please let me know.

Very truly yours,

L. J. LaFrance
Industrial Hygienist
