Transite Substitute

RECEIVED
MAY 16 1984
E. K. JENSEN

Dear Mike:

The attached information on a Transite Substitute was passed on to me by Eleanor Jensen. I am not sure who in Tonawanda would be interested in this product, so I am sending the information to you. Please pass it on.

As you know, Transite contains asbestos. There are concerns when either maintenance or demolition work is done on Transite in that particulate matter may be generated and become airborne. Possibly some thought could be given to evaluate alternative materials if this has not already been done.

Very truly yours,

Nick.
