ASBESTOS INFORMATION ASSOCIATION
NORTH AMERICA
1660 L Street, N.W. / Washington, D.C. 20036 / (202) 223-4885

July 30, 1976

RECEIVED
AUG 3 1976

Mr. Ralph Zumwalde
Environmental Investigations Branch
NIOSH
U.S. Post Office and Court House
Room 331
Cincinnati, OH 45202

Dear Mr. Zumwalde:

This is to confirm that you will be one of the speakers on a panel discussion of asbestos dust monitoring at the Third Annual Industry-Government Conference sponsored by the Asbestos Information Association/North America. The meeting starts at noon on Wednesday, September 8 and continues through the afternoon on the 9th. You will receive complete information in a few days.

An attendance of 250-300 is expected, made up mainly of middle and upper management from companies that manufacture or use products that contain asbestos. A wide variety of company size will be represented as well as government officials and industrial hygiene professionals. We want to stress the practical aspects of monitoring to help those who need to institute or improve asbestos monitoring programs.

The panel members and the topic each will cover are listed below:

Mr. Ralph Zumwalde - Environmental Investigations Branch, NIOSH

The NIOSH Monitoring Procedure.

Mr. Robert G. Keenan - Clayton Environmental Associates

Obtaining monitoring services from consulting firms.

Mr. Stanford K. Christian - The Bendix Corporation

In-house monitoring programs.

An hour has been allocated for this part of the program. It is requested that each of you plan to talk for about 15 minutes to allow some time for questions and discussion. If you have any questions, please let me know.

I would like to express my personal appreciation and that of the AIA/NA for your participation. We feel that there will be a substantial number of people in the audience who have a pressing need for help in this area.

Very truly yours,

Harrison B. Rhodes

Dear Bob,

I was very happy to receive your kind invitation on behalf of the AIA/NA to attend your third Annual Conference on September 8-9 in Washington.

I should be happy to undertake the assignment you have proposed. Your kind offer to bear the expenses of my transportation, billeting and meals is a great help since the IAIC has no adequate resources to meet such expenses and I am reluctant to charge the U.K. organisation or my own company with expenses arising from my position of Chairman of the Standing Committee, although I am sure they would be prepared to do so if necessary. However, it does mean that I can promptly and without consultation accept your most welcome invitation. Atlast I shall be able to see Washington!

There will certainly be a great deal of interest to our members particularly having regard to the OSHA hearings on the proposed revision of standards. As you will have gathered from Harry Hardie and others, we have been having a very difficult time in this country and I hope that by the time of my visit I shall be able to tell you how or if our efforts have been successful in stamping out the adverse publicity.

With my best regards and looking forward to seeing you again.

Yours very sincerely,

A. A. Cross
Chairman - Standing Committee

Memorandum For: MEMBERS

Subject: Notice of Meeting of Directors Annual Meeting and Third Annual Industry-Government Conference

The Annual Meeting of the Association will be held immediately following a meeting of the Board of Directors on Wednesday, September 8. The Board Meeting will commence at 9:00 A.M.. The Association's Third Annual Industry-Government Conference will convene at noon September 8 and continue through mid-afternoon Thursday, September 9. The meetings and Conference will take place at Stouffer's National Center Hotel, Arlington, Virginia. (Five minutes from the Washington National Airport on Jefferson Davis Highway.)

Bill Thurber, Union Carbide Corporation, is chairman of the Conference.

A copy of the tentative Conference program is attached.

Attention to the enclosed registration form is invited. A block of rooms has been reserved at Stouffer's. Costs involved for members attending the meetings and Conference (two luncheons, reception, breakfast, and proceedings) will be absorbed by the Association. Members are encouraged to invite appropriate representatives of their companies to the Conference. Companies are requested to limit attendance to three persons other than program participants. It is anticipated the Association's Standards and Technical Committee personnel will be included in member representation. A charge of $50.00 must be assumed by members for each guest (non-member representative) attending the Conference.

ACL Doc 18832 · Page 10 of 60 asbestosclaims.law/library/18832/10

The Annual Meeting and Industry-Government Conference are very important events in the Association's work year. We look forward to your active participation in the September 8-9 program. We encourage the attendance of non-members within the industry who would benefit from the substance of the meeting and from active membership in the Association. Comments in this connection will be appreciated.

Please return the registration form in the enclosed envelope at your earliest convenience. Deadline for hotel reservations is August 24.

R. H. Mereness
Executive Director

Dear Bob:

This is in furtherance to our conversation this date regarding our invitation to you to participate in a dust control panel during the Third Annual Industry-Government Conference sponsored by this Association. The Conference, attracting some 175 industry, government and labor representatives interested in the asbestos-health issue and means for controlling dust in the work place, will be held at Stouffer's National Center Hotel September 8 - 9. A copy of the pre-printed program is enclosed as are the proceedings from the Conference of last year at which Joe Wagoner represented NIOSH. As you will see, our program format is slightly different this year. Steve Bryant will represent NIOSH on the monitoring panel.

Your participation on the dust control panel is planned for Thursday, September 9, commencing at 9:30 a.m. We believe all of the day and a half scheduled will be of interest to you and, of course, we will be pleased to absorb costs of billeting and meals while you are with us.

We look forward to your confirmation of attendance at the earliest practical date and suggest a telephone call. Ike Weaver of Raybestos-Manhattan is the moderator for the dust control panel and will be in touch with you following your notification of acceptance.

Washington, D. C. 20006

Dear Jack:

We are very pleased that you will be with members and guests of the Association on Wednesday September 8 to participate in our Third Industry Government Conference. The Conference will be held at Stouffer's National Center Hotel on Jefferson-Davis Highway, Arlington. We expect approximately 175 attendees.

We have scheduled your remarks at the beginning session of the Conference. Our annual meeting will be held in the morning. Following the annual meeting there will be a reception and luncheon beginning at 11:45 A.M. to which you are cordially invited.

The enclosed copy of the 1975 conference proceedings will be of interest to you as to purpose and format of these annual conferences. Of special interest to our members this year will be panel discussions on dust control and monitoring of asbestos dust in both the asbestos manufacturing and construction industries. A copy of the Conference program will be forwarded to you a little later.

We would appreciate hearing from you such remarks as you might wish to extend on legislation affecting the asbestos industry and on labor's role with management to assure a safe working environment for the asbestos worker. We are mindful of your fine talk at the American Industrial Hygiene Conference this past May in Atlanta and other addresses you have made to groups such as ours.

Mr. William E. Shoemaker
Regional Program Consultant
NIOSH
P.O. Box 13716
Philadelphia, Pa. 19101

Dear Mr. Shoemaker:

In accordance with our phone conversation last week, I am forwarding herewith the information we discussed that, hopefully, will assist you in preparing for your participation in the AIA dust control panel next month. Included are copies of the two papers from which Messrs. Goldfield and Trosper are expected to extract the predominant part of their presentations. Also included is a copy of the Curtis/Bierbaum report for NIOSH on technological feasibility of achieving the OSHA 2 fiber standard in asbestos textile operations. From my file I have supplied some information on dust suppression liquids, use of foam and water sprays, water jet and laser machining, and some recent developments in brake service dust control equipment.

I have been in contact with Mr. James Gideon at the NIOSH Division of Physical Sciences and Engineering at the Taft Laboratories in Cincinnati regarding investigation of equipment and methods for improving asbestos dust control, particularly for brake service operations. I believe he or his associates can fill you in on the work they are doing and the plans they have for evaluating vacuum cleaners and other equipment for minimizing worker exposure to asbestos and other toxic materials.

For our dust control panel program, I suggest you be prepared to talk for 10 to 15 minutes on the following:

NIOSH Recommended Industrial Ventilation Guidelines
NIOSH Brake Service Recommendations
NIOSH Investigations of Dust Control Equipment and Methods
Any further comments you may have regarding methods, examples, or recommendations on dust control by any means.

I expect the panel program to be arranged roughly as follows:

Introductions -- 5 minutes
Goldfield -- 15 minutes
Trosper -- 15 minutes
Shoemaker -- 15 minutes
Questions and Answers -- 15 minutes
Film -- 20 minutes
Questions and Answers -- 5 minutes

Memorandum For: Mr. Dougherty
Mr. Thurber

Subject: AIA/NA Third Annual Industry-Government Conference, Program Notes

Following are suggested commentary for conduct of the Conference:

WEDNESDAY, SEPTEMBER 8

Luncheon followed by "Welcome" - - Mr. Dougherty

The Asbestos Information Association/North America was founded in December, 1970 bringing together for the first time companies and corporations involved in the manufacture, processing, mining, milling and selling of asbestos for the multitude of products and uses of asbestos in our industrial society with primary objectives to: provide industry-wide information on asbestos and health; exchange information on methods and techniques of asbestos dust control and cooperate with government agencies in developing realistic standards for exposure to asbestos fibers.

This meeting, the Third Annual Industry- Government Conference, attests to the interest in and accomplishments of our Association. It is a pleasure to welcome you. We believe

we have a program of high interest to all of you. We believe you [redacted] will leave this conference with an even better understanding of the problems faced by the asbestos-using industry and the work being done to solve these problems. We look to your continued support. We welcome additional members to assist us in the work of the Association. We hope you will ask questions of our speakers and feel free to communicate with the Association whenever and however we can be of help to you.

I wish to thank all of you for being here today and in particular to express the appreciation of the Association to the outstanding group of experts who will speak to us during the course of the Conference.

It is now my pleasure to begin the conference by introducing our first speaker.

Dr. Andrew W. Breidenbach was confirmed by the Senate as assistant administrator for the Environmental Protection Agency in December of 1975. He is responsible for the offices of water planning and standards, water programs operations, water supply, pesticides programs and toxic substances in EPA. He comes to his demanding position with outstanding credentials. His undergraduate work at the University of Cincinnati was in the fields of chemistry and zoology. He received his masters degree

ACL Doc 18832 · Page 29 of 60 asbestosclaims.law/library/18832/29

and doctorate from the University of Florida in biochemistry and cancer research. Before coming to Washington as EPA assistant administrator, he was Director of the National Environmental Research Center in Cincinnati. Other assignments in his distinguished career include Director of the Division of Research and Development for Solid Waste Management with the Department of Health, Education and Welfare, and assistant Chief of Air Pollution Training for the Public Health Service at the Robert A. Taft Sanitary Engineering Center in Cincinnati where he directed graduate level training for scientists and engineers. Dr. Breidenbach joined the Public Health Service in 1956. He began his environmental career as chief of the Chemistry Division of Maryland's State Health Department in 1953.

Dr. Breidenbach is an international authority in a number of environmental areas. He has served as a leading consultant for the World Health Organization, has lectured before scientific groups both in the United States and abroad, is the author of many scientific articles and reports and a member of a long list of scientific and professional societies.

It is with great pleasure I introduce to you Dr. Andrew Breidenbach.

Remarks of Dr. Breidenbach

Mr. Dougherty: Thank you Dr. Breidenbach (etc.)

I would now like to present to you the chairman of the Conference, Mr. William Thurber of Union Carbide Corporation. Bill . . .

4/ List not complete

Mr. Thurber: Ladies and gentlemen, we will take a ten minute break and reconvene in the James/Potomac Room at _____.

* * * *

Mr. Thurber: To begin this afternoon's session, we are pleased to present the medical advisor to the Association, Dr. Hans Weill, Prefessor of Medicine, Tulane University and international authority on pulmonary disease. We had originally planned to have Dr. Weill speak a bit later in the program but in his capacity as president of the American Thoracic Society he must leave for San Francisco later this afternoon to attend a meeting of that group. We appreciate the kindness of Mr. Jack Sheehan in accepting the change to this schedule.

Dr. Weill received his early medical training at Tulane graduating with honors and being named to Phi Beta Kappa. He interned at Mt. Sinai Hospital in New York and subsequently practiced and taught in Charity Hospital, Veterans Administration Hospital and U.S. Public Health Service Hospital in the New Orleans area in addition to work at Tulane. ~~Presently~~ Currently, in addition to his position as Professor of Medicine at Tulane he is Director of the Specialized Center of Research in Occupational Respiratory Disease. Dr. Weill is the author of numerous scientific papers and a frequent lecturer. We are fortunate to have a medical scientist of such distinguished stature to serve as advisor to the Association. Dr. Weill . . .

Remarks of Dr. Weill

Mr. Thurber: (introduction of Mr. John J. Sheehan):

Searching for solutions to environmental and occupational health problems and ~~directing~~ actions necessary to a safer, healthier atmosphere ~~for man~~ to live and work is an "all-hands" task: Industry, Labor, Government, Academia - all must share in work and responsibilities. We are priviledged today to have with us an outstanding spokesman from organized labor.

Jack Sheehan was appointed Director of the Legislative Department of the United Steelworkers of America, AFL-CIO in 1967. He is concerned with all aspects of lobbying and legislation on the national level. Since the passage of the Occupational Safety and Health Act, he has served widely as a lecturer and instructor on occupational safety and health matters. He is board member of the National Advisory Committee on Occupational Safety and Health (NACOSH) and a member of the Board of Directors of the Occupational Safety and Health Institute. A graduate of St. Joseph's College with BA and MA degrees, he has been on the administrative staff of the Steel Workers since 1951 serving as special advisor and consultant in education and training programs and later as international auditor. He came to the Washington office of the Steelworkers in 1959. He has served as treasurer of the National Civil Liberties Clearing House and is his union's representative with the Leadership Conference on Civil Rights. He is an initial member of the board of the Consumer Federation of America and chairman of the National Air Conservation Commission, an organization sponsored by the American Lung Association.

We are pleased to have you with us , Mr. Sheehan:

Appreciation of Mr. Sheehan remarks --

BREAK

Mr. Thurber: Remarks on practical sessions of Conference: monitoring asbestos dust and technology for control of asbestos dust. Introduction of panel moderator Dr. Harry Rhodes who will introduce his panel members.

Conclusion of first day General Session

Announcements by Executive Director

THURSDAY, SEPTEMBER 9

Breakfast

Mr. Dougherty: Call on Mr. Thurber to introduce OSHA presentation.

Mr. Thurber: All of us here are intimately concerned with the work of the Occupational Safety and Health Administration. Without giving exaggerated attention to our problems I think it can be said that asbestos has been a leading standards issue in OSHA. An emergency temporary standard for exposure to asbestos dust was one of the first formal regulatory actions of OSHA following its founding in 1971. In June of 1972, OSHA promulgated a permanent standard for asbestos, culminating nine months of activity and controversy. The standard was challenged in the courts. In October of this past year, OSHA published

Union Carbide trial exhibit UC-4241: Asbestos Information Association/North America File on the Third Annual Ind... Published by AsbestosClaims.Law
ACL Doc 18832 · Page 33 of 60 asbestosclaims.law/library/18832/33

7/

a proposed revision to the standard calling for drastic lowering of the ~~standard~~. The Association, along with a number of individual member companies, has protested the proposed new standard in comments submitted in April of this year in accordance with the rulemaking process. A date for public hearing on the proposed revision to the standard ~~was~~ is yet to be announced. Meanwhile a standard for exposure to asbestos in the construction industry is in the developmental process. The Association has urged OSHA to defer action on the proposed revision to the general or manufacturing standard until after a proposed construction regulation has been published and its potential impact measured.

This morning we are priviledged to have with us two special representatives from Dr. Morton Corn's office to discuss OSHA's asbestos standards. The Association has worked closely with both of these men and they are known to most of you.

Grover Wrenn has served as chief of the division of health standard development since he joined OSHA in July 1974. He has the very difficult assignment of directing the development and promulgation of OSHA health standards and determining standards-setting priorities.

Immediately before joining OSHA, Grover was a research associate at the University of North Carolina where he assisted in the establishment of the University's Occupational Health Studies Group and additionally coordinated the activities of a

Union Carbide trial exhibit UC-4241: Asbestos Information Association/North America File on the Third Annual Ind... Published by AsbestosClaims.Law

research team to conduct occupational health studies in the rubber industry. He has worked as an industrial hygienist for IBM Corporation and with the Boeing Company and was a partner in consulting firm offering services in air pollution control, industrial hygiene surveys and occupational health programs. He attended Eckard College, Clemson University and received his masters degree in public health from the University of North Carolina. ~~He is a member of several professional societies.~~ Mr. Wrenn is certified by the American Board of Industrial Hygiene and a diplomat of the American Academy of Industrial Hygiene.

(Ray McClure) is the second half of our [illegible]

We are pleased to welcome Ray McClure to our conference once again. Ray is supervisory industrial hygienist in OSHA's Division of Occupational Health. He is intimately acquainted with OSHA's compliance procedures. Ray received his master of science degree in industrial hygiene from the University of Oklahoma and is a fellow of the American Board of Industrial Hygiene, and a reserve officer in the U.S. Public Health Service. His background experience includes professional employment with the states of Oklahoma and Kansas departments of Health, U.S. Naval Gun Factory, Wage and Hour Public Contracts Division of the Department of Labor and Bureau of Labor Standards, Department of Labor.

Remarks by Mr. Wrenn and Mr. McClure

Denver to serve as legal advisor to Robert B. Moran former chairman of the Occupational Safety and Health Administration Review Commission. He joined the staff of the National Chamber in January 1974 as labor relations attorney and then served as director of consumer affairs before succeeding Rick Berman, a speaker at our first Industry-Government Conference. Yesterday we heard from Jack Sheehan, a man who spends much of his time on the Hill and with various departments and agencies of the government, representing the interests of organized labor. Today, we will hear from another expert in government relations in this instance representing the interests of business and industry. Dick we are glad to have you with us.

Remarks of Dick O'Brecht

Mr. Dougherty: Words of appreciation. Presentation to Mr. Fay.

Mr. Thurber: We will take a brief break and assemble in the James/Potomac Room at _____ for this afternoon's general session.

(General Session - afternoon)

Mr. Thurber: Introduction of Alex Cross.

I am confident that our first speaker this afternoon has travelled the longest distance to be with us and we are, of course, very appreciative of his accepting our invitation to come. Mr. Alex Cross is now in his 30th year with Cape Asbestos Ltd.

11/

beginning as an accountant and moving into industrial management. He has served as manager of various asbestos plants in Great Britain. An original member of the Asbestosis Research Council since 1957, he formed the Environmental Committee of ARC in 1968 for development of guidelines in use of asbestos and asbestos-containing products for manufacturers and consumers. He has worked intimately with the Asbestos Information Committee in the U.K. which was also formed in 1968 to speak to the public concern on asbestos-health issues.

In 1975 the International Asbestos Information Conference was established in order to facilitate an exchange of relevant information on asbestos-health issues on an international basis. Mr. Cross was named the chairman of the standing group of this body now consisting of 14 countries in its membership. He serves on a number of important European councils and confederations dealing with occupational health and environmental affairs.

It is indeed with much pleasure to introduce Mr. Alex Cross. Mr. Cross . . .

Dear Alex:

On behalf of the officers and directors of this Association it is my pleasure to invite you to attend the AIA/NA Third Annual Industry Government Conference to be held September 8-9 at Stouffer's National Center Hotel in the immediate Washington, D. C. area.

We would like for you, as Chairman, Standing Committee of the International Asbestos Information Conference, to speak of the various national regulations and their economic effect; new developments in dust control and monitoring techniques; and such other remarks as you might wish to extend including comments on public reaction to adverse publicity and effective counter public information programs. We recall your talk before us in St. Paul last year and those kinds of remarks would be most fitting. You will be our only "foreign"speaker. We suggest about 45 minutes for your presentation. Our program will emphasize the practical problems in the industry with panels on dust control and monitoring. We expect about 200 in attendance. I will forward a copy of our program in the near future.

We will be pleased to pay for your transportation, billeting, and meals. We look forward to your early favorable response and will communicate further at that time with regard to arrangements for your visit.

With all good wishes,

Cordially,

R. H. Mereness
Executive Director

Dear Alex:

We shall communicate formally with you in the next few days to invite you to participate as a speaker representing the International Asbestos Information Conference at our Third Annual Industry-Government Conference September 8-9 here in Washington. Please mark these dates. Your presence is most important to the success of this meeting.

In connection with routine mailings from this Association (such as the enclosure) we are now sending to you, Harry Hardie (for AIC and ARC), Robert Join, Klaus Robock, and William Johnsen. I would be happy to send such material to other associations within the international group. I am also thinking you might simply wish to extract for use in your newsletter. Would you advise?

Hurriedly and as always with best wishes,

Awareness

Down to earth stuff, problems
in monitoring, equipment, techniques, costs
tools. Everyone has a dust problem.

Trosper J-M

Medical – Weil, Kotin, Selikoff

Ind. hygienist – Role of ind. hygienist in
industry today.
– An outsider but allied w/ industry
{Medical records} eg Dow, GM.

Corn – invite him this week for either
luncheon
Wren as backup (compliance (practicalities
& Barry White

Selikoff at Luncheon?

Jack Sheehan – labor movement AFL-CIO(?)
Steiger –?
