Subject Asbestos Measurements

Dave,

Here are all the asbestos measurements we made in 1983 and 1984.

If there is no entry in the "Job Class. Code" column, the sample was "area;" not personnel. In that case, the far right-hand column will also be blank. A key to the "Z's" and "R's" in that column is as ~~follows~~: attached

An "8-Hour TWA Concentration" of 1.00 means that it was not a personnel measurement

or

the exposure time was too short to allow a meaningful calculation

or

we couldn't be sure that there would be no more exposure and thus couldn't be certain of an 8-hour TWA.

I think the rest is clear. If you have questions, please call Bill Young on extension 2434.
