Memo: Jim Dement
Dick La Cour
Peri Yalcinkaya

From: Drew Jackson

Subject: Galveston County Health District Visit

At 9:00 am, February 5, 1991, Mr. Ronald B. Schultz from the Galveston County Health District requested entry to investigate an employee complaint. Mr. Schultz was met in the lobby (Bldg 1) by A. P. Yalcinkaya. After viewing the visitor's video, A. P. Yalcinkaya escorted Mr. Schultz to her office where they were met by A. F. Jackson. Mr. Schultz informed the couple that an employee complained that unit personnel are being exposed to asbestos during the demolition project at Bldg 11. Mr. Schultz requested to visit the jobsite. At 9:45 am, A. F. Jackson contacted Bill Lehmann and informed him of the forthcoming visit.

At 1005, the group met with Ray Bennett (Energy System), Dana Canady (Superior Systems Supervisor), Gene Gilbert (Olshan Supervisor), Larry Hamilton (Energy Systems), and Bill Lehmann (Energy Systems) at Bldg 11. Mr. Lehmann briefed Mr. Schultz on what the demolition involved, namely, the removal of #s 1, 2, 3, 8 boiler and associated pipes. Mr. Canady briefed Mr. Schultz on how his crew were preparing the boilers and pipes to be stripped. At 1020, the group took a walk-thru of the area in question. Mr. Schultz suggested that, although stripping of the boilers had not started, the area around the boiler be adequately posted, ie barricade tape and signs. Mr. Schultz informed the group that he didn't see any problems at the present time. He also stated when the actual stripping of the boilers commenced, he would return.

At 1030, A. F. Jackson and A. P. Yalcinkaya escorted Mr. Schultz back to Bldg 1. Mr. Schultz requested copies of IH monitoring results for asbestos and the notice of demolition/renovation issued by Olshan. Mr. Schultz reiterated his intentions of returning when stripping the boilers commenced. At 1050 am, A. F. Jackson and A. P. Yalcinkaya escorted Mr. Schultz out of the plant.
