Full Name	Loctite Corporation	Interviewed	
Address	705 North Mountain Road Newington, CT	Mr. S. Wojciak, Chemist	
Mfrs. of		(Telecon)	

Mr. Wojciak recently requested literature regarding RG-144 for an undisclosed application. He informed me that they had decided against evaluating the material in a new gasketing instant seal product for automotive applications due to the potential hazards of asbestos. After some reassuring by the writer, he agreed to evaluate RG-244 in his application. They are currently using 8-9% by weight of Cab-O-Sil to develop thixotrophy. The polymer is extremely sensitive to iron oxides and their requirements limit the presence of any oxides to 2 ppm. He thought they might be able to utilize RG-244 despite the magnetite due to the low levels of RG-244 required.

RECOMMENDED ACTION

BLI Follow up within four weeks.
