UNION CARBIDE CORPORATION
P.O. Box 579 Niagara Falls, N.Y. 14302

By B. L. Ingalls

Date 3/22/73

Full Name Cavrock Corporation Industrial Park Avenue Address Vernon, CT 06086 (203) 875-2548 Mfrs. of	Interviewed Al Cummings, Safety Director (Telecon)

Follow up on the status of RG-244 since our having obtained dust counts at their facility. Mr. Cummings said they were extremely encouraged by the low dust count that we found during the monitoring of their production facilities using RG-244. He said since our last call they have switched back to RG-244 and are currently using it throughout in place of Cab-O-Sil. They have already had the necessary medical examinations for their employees and plan to monitor dust semiannually. Mr. Cummings appeared most appreciative and indicated that everyone was pleased that they were able to return to the use of RG-244 since it was much preferred over the pyrogenic silicas both from the standpoint of application and ease of handling.

RECOMMENDED ACTION

BLI Follow up periodically.
