Subject: OS/HS No. 3 Powerhouse - Asbestos

The recent Operational Safety/Health Survey at #3 Powerhouse reported in item HL.2 employee exposure to asbestos. This finding, survey team's recommendations, and the units response are attached. Items 1 and 2 have been adequately addressed by the unit but items 3 and 4 are mainly associated with the maintenance employees. The basis for the teams findings was employee interviews and not direct observation.

If I can provide any assistance in resolving these issues, please let me know.
