W. F. McClure
W. C. Thurber

Subject: Air Monitoring Reports

Enclosed is a list of the Subject which Fred Smith prepared for me about the middle of last year. It is supposedly a comprehensive list of all customer and other air monitoring reports completed at the time.

Per our prior discussion, I think the information contained in the reports could be of value for our litigation; but it must be in a usable form.

There are less than 400 individual reports so a mechanical summary may be more practical than using a computer. I would suggest a separate listing of all reports in three different categories, as follows:

I. By company name, alphabetical
II. By Calidria product used, companies alphabetically arranged under each product
III. By customer application, companies alphabetically arranged under each product

The attached sheet is my suggestion for details of the listings.

All of the reports are filed at Niagara Falls, and I am sure that you will have to provide the labor for developing the listings. Please contact Dan Kapral in this regard.

I would appreciate comments from all on the "project" in general and how I have suggested organizing the information.

John L. Myers
