Mr. A. C. MacLeod, President
Union Carbide Corporation
Chemicals and Plastics Division
270 Park Avenue
New York, New York 10017

Dear Mr. MacLeod,

Thank you for your help. It is most sincerely appreciated.

Mr. John L. Myers, Marketing Manager for Union Carbide's Metals Division, accompanied by Gordan Dickson of Union Carbide and Ray Groya and Richard Kelly of Technical Products Inc., called on us this morning. They have completely answered our immediately disturbing concerns, and will be cooperating with us further to establish the entire matter on a firm and fully acceptable foundation.

It is clear that both Union Carbide and Ceilcote share "honors" for allowing this awkwardness to develop. We apparently have been talking to the wrong people on this matter and should have recognized this. And your people should have realized the need to have us directed to others.

So be it. The favorable result for us is that we will have adequate data to assure safe use of Union Carbide's A-C 244 Calidria Asbestos and be able to convince our employees of that fact. The favorable result for Union Carbide is you have demonstrated again the integrity of being a responsive, responsible supplier offering the important undergirding a Company such as we must have. And more, it appears you may have another product we might use.

If we have caused any uncomfortableness among your people, please let them know the event has strengthened our relationship in a fine way.
