Wood Conversion Company
Cloquet, Minnesota

Attention: Bill Walsh
Purchasing Agent

Dear Mr. Walsh:

At the present time, we are investigating the possibility of Johns-Manville using any surplus material on hand when you switch to our Coalinga Ultrabestos Blue Brand fibre. Therefore, we would appreciate your sending ten pound samples each of the GS and GK fibre that you are presently using to the attention of W. C. Streib, Johns-Manville Research and Engineering Center, P. O. Box 159, Manville, New Jersey.

Thank you.

Yours very truly,

Don Partridge
