Union Carbide Corporation
Mining & Metals Division
P. O. Box 579
Niagara Falls, New York 14302

Dear Mr. Myers:

I am sorry that we did not have more time to review some of the information you provided concerning the Coalinga pelletizing, and its potential for reducing dust exposure.

I should appreciate information that you might have concerning this aspect of pellet use. Also, could I have a dozen or so additional copies of your "Asbestos" magazine reprint (72-0015)?

Sincerely yours,

Irving J. Selikoff, M.D.
Professor
