CORPORATE APPLIED TOXICOLOGY
HEALTH, SAFETY AND ENVIRONMENTAL AFFAIRS DEPARTMENT
P. O. BOX 8361, SOUTH CHARLESTON, WV 25303

To (Name) Mr. R. W. Rebholz
Division H-1374
Location DANBURY/500
Area

Date January 11, 1983

Copy to Dr. Bryan Ballantyne - 511
Mr. M. R. Huffman - 511
Dr. H. C. Lewinsohn - 500

Subject Asbestos Labeling

Dear Bob:

Confirming our several telephone discussions (including this morning), Dr. Hilton C. Lewinsohn (Danbury, P-2590, Ext. 5214) has a considerable depth of experience and expertise in the field of the health effects of asbestos fibers, and he is quite willing to consult with you in this regard.

As we discussed on November 29th, relative to an asbestos package label which also reflects the observed increased risk of lung cancer to smokers, the following is proposed as a "strawman" text: CANCER HAZARD - HIGHER RISK IN SMOKERS.

We have a growing file of toxicology literature in this area, and I am more than willing to share it with you in whatever way you deem appropriate.

With best regards, I am

Very truly yours,

William C. Kuryla, Ph.D.
