By J. E. Walsh

Date 3-4-75

Full Name Standard Paint & Varnish	Interviewed
Address Harvey, Louisiana	A. W. Lynch, Plant Superintendent Don Boaz, Technical Director George Ernst, Purchasing Agent
Mfrs. of Epoxy Coal Tar Compounds	

Call made with Keith Redford, UCC Coatings Salesman, on RG-244 user in epoxy and amide coal tar materials.

Standard had an end of the year shakeup, which changed quite a few of the players around. Fred Kinsler, former Technical Director here, was canned and popped up at Bywater Coatings in Belle Chase. Boaz, who I had known before, came over from Prufcoat in Baton Rouge. He was brought along by Lynch, also a Prufcoat ex. Lynch has a two year contract here, and supposedly Boaz will succeed him when he retires. I had previously spoken with Lynch about a month ago re toxicology, and discussed the subject again with him in the hall, and left him with a packet of information on the subject including our new SPI 244 brochure. According to Boaz, it is a dead issue, as Lynch had some initial concerns when he saw it in the plant due to the problems they had at Prufcoat, but apparently our phone conversation alleviated them. Boaz was a 244 booster at Prufcoat, but never got to use it due to the internal squabbles they had, so he was glad it was already being used here. Also caught him at a good time for both our new zinc-rich primer and high-build maintenance coating brochures, as they have projects now under way on both products, due to settling complaints with Bentone 38. Copies of both brochures plus the steel structures spec were left with Don, who promised to try them out just as soon as things settled down a bit. This was his third week on the job, and he is still trying to familiarize himself with what is going on.
