By J. E. Walsh

Date 3-5-75

Full Name Stebbins Engineering	Interviewed
Address Port Allen, Louisiana	Anil Bhargava Engineer
Mfrs. of FRP Tanks & Fittings	

Call made on new RG-244 customer in FRP products.

Stebbins got turned on to 244, Anil said, when their Division Manager heard about us from one of their competitors. Initially it was tried to solve a problem with a particular resin, but having tried it and liked it, they tested it elsewhere and it worked better than Brand X in all the various resins they use. With that kind of a testamonial coming forth and X no longer used, I could only conclude that these guys had made the right decision, were technically competent, and anything I might add would be superfluous. A short toxicology discussion was held, and Anil was provided with a packet on the subject along with our 244 price list, brochure, and my card. Anil estimates they will use about 2-3 pallets of 244 this year, as business is down for them.

JEW

Once a year call frequency is sufficient here.
