ASBESTOS HEALTH & REGULATORY DOCUMENTS PROVIDED:

- ☐ MSDS
- ☐ Health & OSHA Information Blue Book
- ☐ Dust Count Report
- ☐ Other, specify below

PERSONS INTERVIEWED:

Tom Healy General Manager
Gordon Kalbfleisch Technical Director

CALL OBJECTIVE:

Call made on HPO prospect.

RESULTS OF CALL: Anvil manufactures a latex-based mobile-home roof coating and had used Vanderbilt's fiberous talk. When the asbestos negative publicity got real hot in the state they switched to the non-fiberous Nyad 2 which they now use in T/L quantities. Went over all the positive aspects of using HPO and both Tom and Gordon were quite willing to listen. They have moved into a new plant on the same location and have added a number of dust collecting systems and improved their general all-round housekeeping. The Nyad 2 is getting a little short, Gordon said, and he requested a lab sample of HPO to look at again. If they run into any supply or quality problems or if the HPO substantially improves their product they claim they will consider using it.

FOLLOW-UP ACTION REQUIRED:

J. W. Phone Gordon 3-12 to see how the HPC looks in their roof coating.
