Dust Abatement Program
Respirators

In connection with subject program, we have reviewed various types of respirators and recommend the following as standardization at the Manville Plant, Research Center and G.P.E.D.:

Type of Material	Type of Respirator
Asbestos Dust Silica Dust Diatomaceous Earth Dust Talc Dust Lead Dust Nuisance Dust	Mine Safety Appliances Co. DUSTFOE RESPIRATOR
Nuisance Dust	American Optical Co., A.O. #R9100 RESPIRATOR
Light concentrations of: Gasoline vapors Alcohol vapors Benzine vapors Acetone vapors Carbon Tet. vapors	Mine Safety Appliances Co. MSA COMFO CHEMICAL CARTRIDGE RESPIRATOR (Interchangeable cartridges for various types of material.)
Nuisance concentrations of: Gasoline vapors Alcohol vapors Benzine vapors Acetone vapors Carbon Tet. vapors	Mine Safety Appliances Co. MSA GASFOE RESPIRATOR

For protection against concentrations of toxic materials other than listed, the Safety Department will make individual recommendations upon request.

old system discontinued

We suggest that each Building requiring the use of respirators assign one person responsible for cleaning and maintaining respirators. Filters, facepieces, etc., can be replaced at a nominal cost. Filters should be replaced or cleaned regularly to provide maximum protection.

Why

By way of copy of this letter, we are requesting the E. & R. and Research Store Room to stock an adequate supply of the above respirators and replacement parts.
