Copies: E. W. Nelson - WHQ 2-02

Subject: PRINTED BROCHURES FOR USE IN ALERTING FAMILIES OF ASBESTOS WORKERS TO POSSIBLE HEALTH HAZARDS

In response to E. W. Nelson's memo to you dated May 12, I am enclosing a brochure which we used a number of years ago. On page 9 there is a brief mention of certain precautions which should be taken to ensure that the worker's home environment is not contaminated with asbestos. This is the only brochure that we have which deals with the subject.

Some years ago when this was first distributed to the work force at asbestos-using plants, we had a rather good response from the Manville employee population regarding the brochure's use in informing the workers' families of the possible hazards. In the Manville instance the request was made to the employee to take the brochure home to his family, and our feedback indicated that the majority of the employees did take the booklets home for their wives and families to review.

These booklets are still available, and if you will make such a request to Walt Cooper, stating how many of these booklets you have need for, he will see that they are sent to you.
