Johns-Manville

Internal Correspondence

To: HS&E Staff

Date: August 18, 1977

From: Walt Cooper

Copies:

BAIZS FOR FILES

Subject: NEW BOOKLETS

Attached are two new booklets recently issued by HS&E.

The red one (love that color) is the third in a series of guides for supervisory people. (Others are on asbestos and PVC.) It will be distributed through the fiber glass operations, but it also could be given to customers and others.

The white paper is the medical study done by Clark Cooper on diatomite. It is designed as a supplement to a position paper now in printing stages, which will be ready in September. It also could be given to people who have questions about the health effects of diatomite.

If you'd like additional copies, let me know.
