HEALTH SAFETY & ENVIRONMENT DEPARTMENT

EDUCATIONAL MATERIAL ON ASBESTOS & HEALTH

THE ASBESTOS REPORT

Attached is a copy of a special newspaper, "The Asbestos Report," which will be sent to all U.S. and Canadian plants where asbestos is used. Plant and employee relations managers will be instructed to distribute copies to all employees. A list of the operations to receive copies and the number of copies sent also is attached.

Please let my office know if you would like additional copies to be sent to other interested groups. We can handle distribution for you if desired.

FILM: WORKING WITH ASBESTOS

A new 25-minute film focusing on the health aspects of asbestos and what the asbestos industry is doing to control exposures now is available for preview viewing. A copy of the program guide which explains the content of the film is attached.

Divisions are being asked to order prints of the film and to coordinate showings in their respective plants. Since the film is designed for general audiences, it also could be used to educate sales representatives, customers, and other interested parties.

Please notify my office to arrange a viewing of this film.

SLIDE PROGRAM: WORKING WITH ASBESTOS

Also just produced by the Health, Safety & Environment Department is a 20-minute slide/tape presentation on health aspects of working with asbestos. It is geared to employee audiences.

A complete copy of the program is being sent to the plants noted on the attached list, with instructions to show it to every employee who may come into contact with asbestos.

Additional copies of the program also are available for preview at WHQ. Contact my office if you desire to see the program. The attached Program Guide outlines the entire presentation that will be given to employees.

SLIDE PROGRAM: INDUSTRIAL HYGIENE

A new, 25-minute slide/tape program outlining the activities of our Industrial Hygiene group will be circulating in the next month. This program will be given by industrial hygienists during their plant visits. However, copies of the complete presentation can be made available to other groups for

educational purposes. Again, contact my office to arrange additional showings.

MAILING LIST

We are endeavoring to compile a special mailing list of people who should be kept abreast of new communication programs developed by the Health, Safety & Environment Department. Please notify my office of any additions or deletions you believe should be made to the attached list.
